

ABOUT BUMBLE

Bumble is a location-based social application that facilitates communication between interested users. It can be used for business connections, friendships and most commonly for dating. Bumble is open to any sexuality but is primarily for heterosexuals' relationships. In heterosexual matches, only female users can make the first contact with matched male users, while in same-sex matches either person can send a message first.

The best way to stay safe on Bumble is to ask yourself these questions.

HERE ARE A FEW CONVERSATION STARTERS:

1. Why do you like being on Bumble?
2. How many matches do you have?
3. How many matches are you actively talking to?
4. How many matches have you given out personal information such as a Snapchat username, phone number or location to?
5. Have you ever received an uncomfortable message?
6. Would you want your boss to see the photos on your profile?
7. What does your bio say?
8. What are you looking for? Is that made clear on your profile?
9. What is the furthest distance you are looking for matches in?
10. How does getting a match make you feel?

SOMETIMES YOU HAVE TO GET TO KNOW SOMEONE REALLY WELL TO REALIZE YOU'RE STRANGERS.
